Blood Transfusion Set

ID: A1010

For Single use only
Air-vented or non-vented chamber, injected or molded for selection Specially designed filter for Blood transfusion only Completed list of spare part for meeting with any application Standard 6% Luer Lock or Luer Mount injection port Production strict to ISO8536-98.Pcs/Ctn: 400

| Item ID	Description	Lenght	Drops/ML
2010	10DPM chamber with blood filter, longth 80", regulating clampwith stopper, latex bulb injection site. (injection site)	80 Inch	10/15drops

Extension tube

ID: A1011

Medical-graded PVC tube, flexible to any application. With standard stopcock, uniform to all connection or injection site Sample Luer Adapter(optional) With stopcock for meeting with multipurpose application Pcs/Ctn: 400

Item ID	Extension	Description
2040.10	Extension Tube	2 slide clamps, 2 "Y" injection sites Length: from 25cm-150cm, individual blister pack
2040.15	Extension Tube	Male Luer Lock to Male/Female Luer Lock, Length: from 25cm-150cm, no return valve for selection, Resistant to 10kg/cm2 = 10 bars, individual blister pack
2040.20	Catheter Extension	With Side outlet and injection membrane, Luer Locking. Individual blister pack
2040.25	Multipurpose Extension Tube	With 3-way stopcock and injection membrane, Luer Locking. Individual blister pack

Burette I.V Set for Child Use

ID: A1012
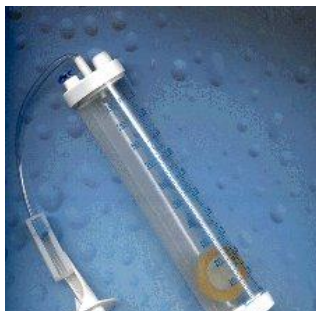

100% latex free, Sterile, pyrogen free
Extra clean burette with graduation, for easy identification
Accurate rate control during gravity infusion
Auto-valve for avoiding the risk of free flow
Medical-grade PVC tube, specially designed for no bending
Standard clip, adjuster and injection site for meeting with
multipurpose infusion.Production strict to ISO8536-98
Pcs/Ctn: 100

Item ID	ML	Description
2030.10	100ML	mixing chamber with injection port, 60 DPM drip chamber, length 85", 1 "Y" injection sites, regulating clamp, with luer lock site, soft blister pack.
2030.20	150M	

Feeding Set/Pumping Set

ID: A1013

100% latex free, Sterile, pyrogen free
Extra clean burette with graduation, for easy identification
Auto-valve for avoiding the risk of free flow.Medical-grade
PVC tube, specially designed for no bending Standard clip,
adjuster and injection site for meeting with multipurpose
infusion. Production strict to ISO8536-98Pcs/Ctn: 100

| Item ID	Description
2050.10	With Universal Adaptor, soft chamber, adjustor, by gravity feeding Total length: 1800mm
2050.15	Connected with 1000ml Feeding Bag

I.V Cannula/Normal Style w/Teflon Tube

ID: A1014

PTFE Cannula, keeping soft and steady character
Thin-wall needle cannula, extra sharped for
penestration Color coded standard luer hub for easy
identification
Wide range including butterfly wing, injection port
or normal for choose
Available for the tri-valve and heparin cap for
selection Sterile by E.T.O, In Ribbon Packing/PE
bag pack Production to ISO8536 and BSI

Latex surgical glove

ID:C1001
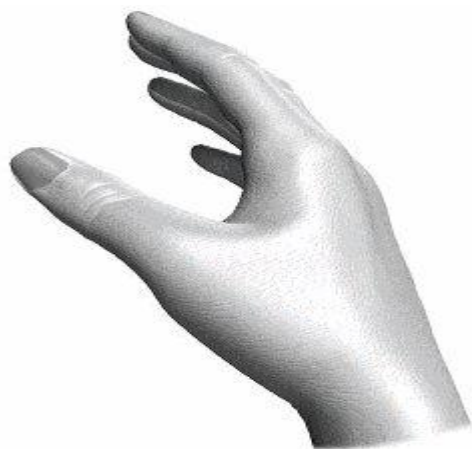

Surgical glove specifications:
- Natural rubber latex
- Micro roughened, non slip surface for optimal sensitivity
- Improved elasticity and fully anatomical design reduces hand fatigue
- Manufactured in accordance with BS 4005 / EN 455 / ASTM D-3577
- Sterile as long as the peel pouch is sealed and undamaged

ID	Size	Type	Packed
LX-1013	6, 6.5, 7, 7.5, 8, 8.5, 9	Latex, sterile, powdered	50 pairs
LX-1018	6, 6.5, 7, 7.5, 8, 8.5, 9	Latex, sterile, powder free	50 pairs

Latex glove, powdered

ID:C1002

The Latex gloves are ultra lightweight and elastic but at the same time near impossible to tear. These qualities results in:
- Less ripped gloves
- Increased comfort
- Touch sensitivity equal to working without gloves
The Latex glove abides with government sanctioned demands to disposable medical gloves and gives you a great opportunity to reduce costs while ensuring the health of both your patients and staff.

Type: Non-sterile, slightly powdered disposable gloves Material: Natural latex
Design: Ambidekstral
Storage: Dry, 10 - 30 degree Celsius
Expiration date: 5 years
AQL: 1,5
Remaining humidity: < 0,8 %
Remaining protein: < 200 µg/gram
Powder level: 120 mg/glove
Stretching ability: 700%
Fracture strength: > 21 MPa
Standards: ASTM D3578, EN455, ISO 9001:2000
CE approved: Yes
Packing: 100 pcs. per box, 10 boxes per carton

ID	Size	Type	Packed
LX-1011	S, M, L, XL	Latex, powdered	100 per box

21

Latex glove, powder free

ID: C1021

The Latex glove ARE ultra lightweight and elastic but at the same time near impossible to tear. These qualities results in:
- Less ripped gloves
- Increased comfort
- Touch sensitivity equal to working without gloves

The Latex glove abides with government sanctioned demands to disposable medical gloves and gives you a great opportunity to reduce costs while ensuring the health of both your patients and staff.

Type: Non-sterile, powdered free disposable gloves
Material: Natural latex
Design: Ambidekstral
Storage: Dry, 10 - 30 degree Celsius
Expiration date: 3 years
AQL: 1,5
Remaining humidity: < 0,8 %
Remaining protein: < 50 µg/gram
Powder level: 2 mg/glove
Stretching ability: 700%
Fracture strength: > 21 MPa
Standards: ASTM D3578, EN455, ISO 9001:2000
CE approved: Yes
Packing: 100 pcs. per box, 10 boxes per carton

ID	Size	Type	Packed
LX-1015	S, M, L, XL	Latex, powder free	100 per box

Nitrile glove, powdered

ID:C1002

The Nitrile gloves holds the same degree of elasticity as you will find in latex gloves. Combined with the ultra lightweight feel of the Nitrile glove you will get:
- Less ripped gloves
- Increased comfort
- Touch sensitivity equal to working without gloves
- A more secure grip as a direct result of the uneven surface

The Nitrile glove abides with government sanctioned demands to disposable medical gloves and gives you a great opportunity to reduce costs while ensuring the health of both your patients and staff.

The Nitrile glove is also and excellent alternative for those allergic to latex. Dentists should choose the Nitrile glove when using strong chemical.

Type: Non-sterile, slightly powdered disposable gloves
Material: 100% synthetic nitrile
Design: Ambidekstral
Storage: Dry, 10 - 30 degree Celsius
Expiration date: 5 years
AQL: 1,5
Remaining humidity: < 0,8 %
Stretching ability: 500%
Fracture strength: > 14 MPa
Standards: ASTM D6319, EN455, ISO 9001:2000
CE approved: Yes
Packing: 100 pcs. per box, 10 boxes per carton

ID	Size	Type	Packed
NL-1031	S, M, L, XL	Nitrile, powdered	100 per box

Nitrile glove, powder free

ID: C1002

The Nitrile gloves hold the same degree of elasticity as you
will find in latex gloves. Combined with the ultra
lightweight feel of the Nitrile glove you will get:
- Less ripped gloves
- Increased comfort
- Touch sensitivity equal to working without gloves
- A more secure grip as a direct result of the uneven
surface
The Nitrile glove abides with government sanctioned
demands to disposable medical gloves and gives you a
great opportunity to reduce costs while ensuring the health
of both your patients and staff.

Vinyle glove, powdered

ID: C1020

The Vinyle gloves hold a much higher degree of
elasticity than you are likely to find in an
avarage vinyle glove.Combined with the ultra
lightweight feel of the Vinyle glove you will get:
- Less ripped gloves
- Increased comfort
- Touch sensitivity equal to working without

gloves

The Vinyle glove abides with government sanctioned demands to disposable medical gloves and gives you a great opportunity to reduce costs while ensuring the health of both your patients and staff.

The Vinyle glove is also and excellent alternative for those allergic to latex.

Type: Non-sterile, slightly powdered disposable gloves Material: Vinyle (Poly Vinyle Chlorid - PVC)

Design: Ambidekstral

Fetal Doppler Model 168L (Pink)

Item ID
168L

CE Approved Fetal Doppler Model 168L (Pink), with earphone, a type of hand fetal Doppler, could meet the needs in the obstetrics department and clinics, especially the needs of the pregnancy for daily examination at home. Model 168L capable of catching the fetal heart tones via earphones could transmit the real-time fetal heart tones (could also be recorded by a computer via some software) to the doctors or hospital via the telephone cable with the help of the interface port. Features:
* with a large piece of built-in supersonic crystal, convenient for the pregnant to locate the fetal heart.
* with a special interface for the fetal heart tones transmission
* with a fetal movement button, producing the sound of telephone when pressed.
* with an ability to catch the fetal heart tones of a 12-week-old or elder fetus
* with lovely outline.

Overbed table (model 31812)

ID: J1050

1.It made of steel sheet 1,8mm, plywood and stainless steel pipe
2. Table Top : Laminated furnished plywood (heat resistance)
3. Lower construction : Steel sheet , epoxy powder coating finished
4. Castor : Four 2" castors
5. Adjustable with stainless steel

Item ID
j1050
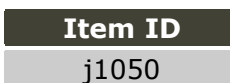

Mattress (model 33603b)

ID:J1051

+ Made of natural rubber, strong linen cover and anti bacteriostatic type
+ Foldable to suit the contour (backrest, fowler, etc.)
+ 10 years quarantined
Length:1700mm, Width:700mm,
Thickness:100mm
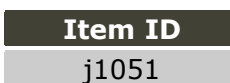

Item ID
j1051

Infuse stand (model 36101)

ID:J1052

Infuse stand with castors.
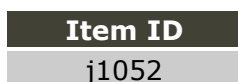

Item ID
j1052

6. Laser

Next Laser
ID:E1001

Infrared biostimulation laser Acupuncture, auriculotherapy, local therapy. Instantaneous power: 10,000 mW at 904 nm. Preprogrammed NOGIER frequencies depending on the desired therapeutic effect: analgesia - tissue regeneration - muscle relaxation.
Characteristics of laser emission Various types of lasers have been developed for various applications. The lasers used in reflex therapy and local therapy differ from surgical lasers. They are called "soft lasers" or

Item ID
E1001

"cold lasers" as their mean power is of the order of several milliwatts (mW). These types of lasers deliver a low energy and do not induce any thermal effects.

Several important criteria must be taken into account when choosing a laser devices.
1/ Wavelength
The cell is the basic constituent of living tissue. It reacts to external stimuli by means of a large number of specific captors. Laser light is one of these stimuli. It acts on the cells metabolism and environment. The biological mechanism of action has not been fully elucidated, but the electromagnetic field induced by coherent emission of the photons composing the laser beam appears to have an action on the membrane polarity of the cells. This facilitates intercellular exchanges.

SEDATELEC has chosen to use laser radiation sources emitting at a wavelength of about 900 nm. This wavelength is only slightly reflected by haemoglobin and poorly absorbed by water. The laser beam can therefore irradiate deep tissue layers.
This wavelength ensures an effective action on cutaneous problems and on deeper muscular lesions. It also allows stimulation of trigger points and acupuncture points to a depth of 1 or 2 cm.

Extremely usefull in auriculo medicine, and posturologi, for diagnose and treatment. Please notise, learn VAS(Vascular Automic Signal) before you buy this amasing laser.

BTL 5000 prof. laser

ID:E1005

The BTL-5000 Laser series presents the best in low level laser therapy (LLLT) treatment, Black and white touch screen for easy operation, 400 mw infra read, patient database, continuous or puls, 150 preprogrammed treatment, sport, dermatology, dentistry, general praksis, neurolgy, ent, Nogier fr. EAV fr, and much more, user guide, pc and printer connection, sound volume, screen brigthness, screen saver and much more.
- Black and white touch screen for easy operation
- 2 outputs for simultaneous connection of red and infrared probes
- Continuous and pulse laser therapy (frequency modulation 0-5000Hz)
- Infrared probes of 830nm wavelength and 400mW power output
- Holder for laser probes
- Duty factor setting 10-90% in steps of 10%
- Pre-programmed treatment protocols and 150 free lots for user-created protocols
Self-test of connected probes. As ekstra Equipment you can have:
Acupuncture set for laser acupuncture
Standard:
- Nogier and EAV frequencies
- Built-in patient database connecting patient data with treatment protocols (150 treatments only laser in the world)
- Built-in user guide and online help
- Connection to a PC and computer network
- Printer interface
- Sound volume adjustment, display colour and brightness setting, screen saver, auto switch-off.

Operation:
- continuous pulse 0.1 -5000Hz, 0.1-10000Hz (optional), adjustable in steps of 0.1 (0.1-9.99Hz), 1Hz(10-99Hz), 10Hz (100-990Hz), 100Hz (1000-10000Hz)
- Duty factor 10-90%
- Max. output of infrared probes 400 mW
- Laser class 3B
- Laser type semiconductor
- Dimensions 230 x 390 x 260mm
- Weight (less accessories) approx. 4.7kg
- Mains supply 230V/50-60Hz, 115V/50-60Hz

BTL 2000 prof.laser

ID: E1006

Powerfull handy 400 mW infrared laser with all possibilities, LCD display with an extremely easy operation, Continuous and pulse therapy (frequency modulation 0-5000Hz), Holder for laser probes, Duty factor setting 10-90%, Pre-programmed treatment protocols and free lots for user-created protocols, Self-test of connected probes and outputs, (Acupuncture set for laser acupuncture is ekstra equipment), Nogier and EAV frequencies, Built-in patient database and much more. IMPORTANT, we can deliver 400 mW infrared,

Item ID
E1006

- LCD display with an extremely easy operation
- Continuous and pulse therapy (frequency modulation 0-5000Hz)
- Infrared probes of 830nm wavelength 400 mW power output
- Holder for laser probes
- Duty factor setting 10-90%
- Pre-programmed treatment protocols and free lots for user-created protocols
- Self-test of connected probes and outputs
As ekstra equipment:
Acupuncture set for laser acupuncture
Standard equipment:
- Nogier and EAV frequencies
- Built-in patient database
- The BTL-2000 is available with software for rehabilitation , dentistry , dermatology , gynaecology , ENT , orthopaedics, sports medicine, paediatrics and general practise
Technical specifications:
- Laser type semiconductor
- Modes of operation continuous and pulse
- Laser beam divergent and convergent
- Density continuously adjustable in the range of 0.1-99.0J/cm2 0.1-10.0J/cm2, in steps of 0.1 11.0-99.0J/cm2, in steps of 1
- Frequency continuously adjustable in the range of 0.1-5000Hz
0.1-10Hz in steps of 0.1Hz
10-100Hz in steps of 1Hz
100-1000Hz in steps of 10Hz
1000-5000Hz in steps of 100Hz
- Nogier and EAV frequencies
- Therapy time automatically calculated
- Wavelength 830nm

- Max. probe power 400mW
- Probe power adjustable in 20-100% of maximum power
- Irradiation area continuously adjustable in the range of 0.1-99.0cm2
0.1-10cm2, in steps of 0.1
11.0-99.0cm2, in steps of 1
Acupuncture treatment location of acupuncture points (visually and by acoustic signal)
- Duty factor 10-90%
- Laser class 3B
- Power supply built-in accumulators 8 x NiCd
- Mains supply 230V/50-60Hz, 115V/50-60Hz adapter
- Dimensions 130 x 230 x 30mm
- Weight (less accessories) 0.7kg

Therapeutic laser
ID: E1007

Therapeutic laser white series, is designed for easy use and is understandable even for those who are new to laser technology, is a stationary, computer-controlled therapeutic laser that employs red and infrared BTL laser probes of various powers within the range of 30 -- 300 mW, special optical attachment, own programmes can be created and saved, operates

in both continuous and pulse modes; pulse frequencies are adjustable within the range of 0.1 -- 5000 Hz, automatically tests laser probe performance and corrects the power for optimal laser ouput. Incl. Special Eywear

saved operates in both continuous and pulse modes; pulse frequencies are adjustable within the range of 0.1 -- 5000 Hz automatically tests laser probe performance and corrects the power for optimal laser ouput Laser beam class 3B
Laser type semi-conductor
Modes of operation continuous pulse
Laser beam divergent convergent
Density 0.1 -- 99.0 J/cm2
Frequency continuously adjustable in the range of 0.1 -- 5000 Hz
Therapy time automatically calculated
Wavelengths 685 -- 830 nm
Maximum power output 30 -- 300 mW
Duty factor adjustable in the range of 10 -- 90 %, step 10 %
Mains supply 198 V - 252 V/50 - 60 Hz ; 100 - 126 V/50 - 60 Hz
Dimensions 225 x 375 x 130 mm
Weight 4.3 kg

BTL-4710 Sono Pro
ID: E1008

1-channel Ultrasound

- On-line encyclopaedia with pre-set protocols based on years of medical research
- Multifrequency ultrasound system with visual patient contact control
- Anatomically shaped heads for comfortable ultrasound application
- Water resistant heads for subaqual treatment
- Connection with other BTL products: electrotherapy

Item ID
E1008

- High luminance displays for timer and other main parameters
- User-defined protocols
- Identification of accessories and accessories maintenance check
- Multilingual unit
- Bulit-in rechargeable battery
- Multiple contact indicator (on the ultrasound head, display, sound alarm)
- Easy connection with BTL electrotherapy unit for combined treatment
- Pre-programmed protocols
- PC connection (for SW upgrades)
- BTL Cart (option)
- Ergonomic multi-frequency ultrasound heads (1 and 3MHz) of 4 & 1 cm2
- Continuous and pulse mode
- Water resistant ultrasound heads
- 1-channel portable ultrasound therapy unit with graphic displays
- Portability
- Ultrasound frequency 1 and 3 MHz
- Simultaneous connection of two ultrasound heads
- Therapeutic encyclopaedia

BTL-4800SL Combi
ID: E1009

1-channel Ultrasound + 1-channel Laser

- Treat 2 patients at the same time with independent therapies
- On-line encyclopaedia with pre-set protocols based on years of medical research
- Multifrequency ultrasound system with visual patient contact control
- **Anatomically shaped heads for** comfortable ultrasound application

Item ID
E1009

- Water resistant heads for subaqual treatment
- Connection with other BTL products: electrotherapy
- Save your time: treat large areas by high-powered BTL laser clusters (up to 1800mW)
- High luminance displays for timer and other main parameters
- User-defined protocols
- Identification of accessories and accessories maintenance check
- Multilingual unit
- Bulit-in rechargeable battery
- 2 independent channels

- Multiple contact indicator (on the ultrasound head, display, sound alarm)
- Test and identification of connected probes & clusters
- Wide choice of probes: red probes of 685nm wavelength and 30-50mW output power, infrared probes of 830nm wavelength and 50-400mW output power
- Wide range of laser clusters (red, infrared, combined) up to 1800mW output power
- Choice of optical attachments for ENT, urology, dentistry and gynaecology
- Protocols for different medical fields (rehabilitation, orthopedics, sports medicine, dentistry, gynaecology, dermatology, ENT, paediatrics, general practice)
- 2 different therapies in one unit!
- PC connection (for SW upgrades)
- BTL Cart (option)
- Ergonomic multi-frequency ultrasound heads (1 and 3MHz) of 4 & 1 cm2
- Continuous and pulse mode
- Water resistant ultrasound heads
- Portable combined therapy unit (1-channel ultrasound and laser) with graphic & numeric displays
- Portability
- Ultrasound frequency 1 and 3 MHz
- Simultaneous connection of two ultrasound heads
- Therapeutic encyclopaedia
- Option of the holder for laser clusters and probes for easy and comfortable laser application

BTL 5720-Sono
ID:E1010

2-channel Ultrasound, upgradeable
- Touch screen for comfortable operation
- Treat 2 patients at the same time with independent therapies
- Anatomically shaped heads for comfortable ultrasound application
- Water resistant heads for subaqual treatment
- Connection with other BTL products: electrotherapy
- On-line encyclopaedia with pre-set protocols based on years of medical research

- Multifrequency ultrasound system with visual patient contact control

Item ID
E1010

- User-defined protocols
- Colour frame option
- Multilingual unit
- 2-channel ultrasound unit with touch screen for easy and comfortable operation
- 2 independent channels
- Ergonomic multi-frequency ultrasound heads (1 and 3MHz) of 4 & 1 cm2
- Simultaneous connection of two ultrasound heads
- Ultrasound frequency 1 and 3 MHz
- Continuous and pulse mode
- Water resistant ultrasound heads
- Multiple contact indicator (on the ultrasound head, display, sound alarm)
- Easy connection with BTL electrotherapy unit for combined treatment
- Large touch screen display
- Pre-programmed protocols
- Therapeutic encyclopaedia
- Built-in patient database
- PC connection (for SW upgrades)
- BTL Cart (option)
- Identification of accessories and accessories maintenance check
- Unique Modular System ™ - option of later unit upgrades

BTL-5825SL Combi

ID: E1011

Item ID
E1011

- 2-channel Electrotherapy with additional currents + 1-channel Ultrasound + 1-channel Laser
  Touch screen for comfortable operation
- Treat 2 patients at the same time with independent therapies
- Choose from over 5000 waveforms and their modifications
- Connection with other BTL products: vacuum unit and/or ultrasound
- Anatomically shaped heads for comfortable
- ultrasound application
- Water resistant heads for subaqual treatment
- Connection with other BTL products: electrotherapy
- User-defined protocols
- Colour frame option
- Multilingual unit
- Combined therapy unit (2-channel electrotherapy with additional currents, ultrasound, and laser) with touch screen for easy and comfortable operation
- 4 independent channels
- Most important low and medium frequency waveforms include: galvanic (Iontophoresis), Diadynamics, Träbert 2-5, Faradic, Neofaradic, Russian stimulation, stimulation pulses, rectangular pulses, TENS symmetric, asymmetric, alternating, 2-pole interference, 4-pole interference, triangular pulses, exponential pulses with rise, combined pulses, and programmable sequences of diadynamic currents, and other selected currents, isoplanar vector field, dipole vector field, interrupted pulses, Leduc current, H-waves and microcurrents, electrodiagnostics
- Test of quality of electrodes and patient cables
- Ergonomic multi-frequency ultrasound heads (1 and 3MHz) of 4 & 1 cm2
- Simultaneous connection of two ultrasound heads
- Ultrasound frequency 1 and 3 MHz
- Continuous and pulse mode
- Water resistant ultrasound heads
- Multiple contact indicator (on the ultrasound head, display, sound alarm)
- Test and identification of connected probes & clusters
- Wide choice of probes: red probes of 685nm wavelength and 30-50mW output power, infrared probes of 830nm wavelength and 50-400mW output power
- Wide range of laser clusters (red, infrared, combined) up to 1800mW output power
- Choice of optical attachments for ENT, urology, dentistry and gynaecology
- Protocols for different medical fields (rehabilitation, orthopedics, sports medicine, dentistry, gynaecology, dermatology, ENT, paediatrics, general practice)
- 3 different therapies in one unit!!!
- Large touch screen display
- Therapeutic encyclopaedia
- Built-in patient database
- PC connection (for SW upgrades)
- BTL Cart (option)
- Unique Modular System ™ - option of later unit upgrades
- Possible connection with BTL Vac (vacuum unit) - option
- Identification of accessories and accessories maintenance check
- Option of the holder for laser clusters and probes for easy and comfortable laser application

7. Ultrasound scanner

Osteopro Ultrasound
ID:H1001
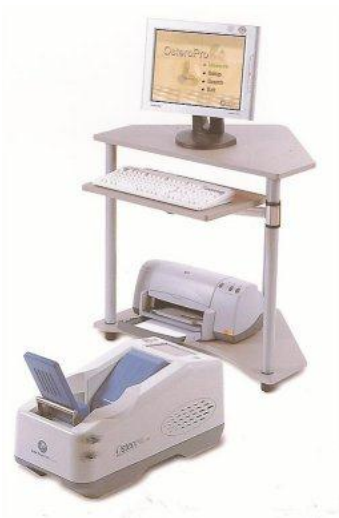

OsteoPro features and advantages
More Accurate
- Using WHI diagnostic standard parameter, OsteoPro provides reliable diagnostic results.
- OsteoPro uses oil medium, it is similar with the water but oil is not affected by temperature changes. It reduces diagnostic errors and improves the precision and accuracy remarkably.
- T-score Precision: Less than 0.1 percent.
More economical
- The strong point of OsteoPro is the ballon with durable material.
- The balloon is permanent, so there is no risk of a balloon blowout.
- No replacement balloon, so it saves the cost of consumption goods.
- OsteoPro has built-in pc, monitor and printer, so operator can diagnose only with main equipment.
- As it is portable, it installs at a small place.
- OsteoPro takes oil medium for ultrasound diagnosis, so it needs no water replacement and calibration regularly.
- The diagnostic time will be 15 seconds and it is much faster than our competitiors.

Item ID
H1010

OsteoPro fixes the distance of an ultrasound sensor and minimizes the changes of the contact pressure between the ultrasound sensor and the skins contact area by using a water bladder.
Furthermore, adjustments of the measuring positions in accordance with the size of the foot as well as foot fixation are achieved simultaneously during measurement. Hence, having a footplate that satisfies identical measurement criteria, it has the reproducibility of very high diagnostic results
